WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Both covers are 440 mm wide (the gap between the rails).

Rear cover: a half round, 41 mm mean radius, 129 mm of sheet. Roll it round a 80 mm bar. It wraps the back of the rear roller.

Front cover: 41 mm mean radius, 102 degrees of arc (73 mm of sheet), from straight below the front roller round to 12 degrees above the axle at the front.

Each cover has a 15 mm tab bent out flat at each end; the tabs lie on the rails' inside walls, one M5 screw each into a rivet nut.

Fit: 14 mm or more from the belt all round; the rear cover guards the rear roller, the front cover the in-running nip under the front roller.

Check: the belt turns by hand without touching either cover.
