P1	Making sketch for the prototype build plan	2026-10-01	AC

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Boards: cut two 1060 x 70 mm strips of 6 mm HDPE; round the corners to 10 mm and chamfer the inner top edge 2 mm.

Four 6.5 mm holes in each, 40 mm from the inner edge, at 30, 370, 710 and 1030 mm from the rear end.

Spacers: eight 13 mm lengths of 12 x 2 mm aluminium tube.

Fit: each board on four spacers on the rail top, M6 x 25 button-head screws into the rail's rivet nuts. The board's inner edge lies 5 mm over the belt edge and 3 mm above it; its rear end 60 mm from the rail's rear end.

Check: slide a 2 mm feeler between board and belt along its length.
